Relation between applications of robots and their performance Service use.

prepa udem

Mision: Help Visually Impaired teenagers studying high school move on their own.

SIRON

The problem

The Visually Impaired

► We saw that this disability affects the teenagers on their studies and we WANT TO HELP THEM.

prepa udem

Our solution

A diadem wich will guide you!

No more dogs.

Now we introduce SIRON.

prepa udem

Our design

prepa
udem

How does it work?

prepa
udem

- ▶ The diadem will have camera lens, which may guide you, read texts and will have infrared light. The battery will be charged from the cellphone and it will be used by the control voice.

Who will use it and how?

prepa
udem

The person will be able to control it by voice commands.

Students with this disability or someone who is visually impaired.

prepa
udem

- ▶ Give us a chance so we can give them a chance.
