

Introduction of Our School

School name: National Junior College
国家初级学院

School address: 37 Hillcrest Road
Singapore 288913

School URL: <http://nationaljc.moe.edu.sg>

PR message: Service with Honour

Founded in 1969, NJC is the first Junior College to be established in Singapore. Since 2009, our College has offered the 6-year Integrated Programme, completing Junior High (7th – 10th Grade) and Senior High (11th and 12th Grade) education. Amongst all the values that are taught, we believe that Service with Honour is of utmost importance. To us, Service with Honour is to do something meaningful and worthwhile during our lives – not just for ourselves, but for our country.

The wide variety of programs offered by our College has allowed us to have a Holistic Education. This has made our time at NJC memorable and fulfilling. Our College spirit is clearly evident during our school-wide events, such as National Day Celebration.

Programmes:

NJC has a variety of enriching programmes aimed to improve the development of our students.

- **Enrichment Science Training and Research Programme (E-STaR)**

Students can experience International Research Collaboration with 9 partner Institutes overseas and immerse in cultural exchanges. They may also undertake attachments with local Universities and Research Institutes, such as the various Institutes under the Agency for Science, Technology & Research. Students also have the opportunity to participate in local and international science fairs.

*NJC Contingent at the 17th Singapore Science and Engineering Fair in March 2017
33 awards were clinched, including the nomination of 1 National Delegate for the Intel ISEF*

- **Art Elective Programme**

NJC also has an art block which was built in conjunction with the Art Elective Programme (AEP). The Art Block contains facilities such as a 3-dimensional work-pottery-sculpture studio and a pottery kiln room to heighten our student's learning experience towards Art.

- **Values-In-Action Community Service**

To inculcate empathy and compassion in our students as well as to live up to our College's motto of Service with Honour, NJC has opened up various programmes such as Overseas Community Service Trips.

- **On-Campus Boarding Programme**

The boarding activities ensure that students have a holistic education. The four main thrusts of NJC's Enhanced Boarding Programme are:

1. *Sustained development of self-identity*
2. *Nurturing of community awareness and rootedness*
3. *Rigorous leadership development*
4. *Capacity building through non-examinable components*

- **Co-Curricular Activities (Sports & Games, Performing Arts, Clubs & Societies)**

In order to develop their character and servant leadership, our students also actively participate in various Co-Curricular Activities. These activities also provide our students with a Holistic Education.

Features:

NJC has a range of sports facilities dedicated to Physical Education and various after-school Co-Curricular Activities (CCA) that students are involved in. Also, NJC's Aesthetic Block houses various activity rooms such as music rooms and dance rooms. NJC is home to a special group of laboratories known as the Sigma Labs, having been fitted with sophisticated instruments and equipment for scientific investigation. The Sigma Labs is designated as the South Zone Centre for Science and Technology, aimed towards promoting interest in science and research amongst students and teachers.
