Our school:

CETIS 26 offers technical education, the students can either study a technical career to start a new job or continue with higher education in Technological Institutes or Universities, so the students get practical abilities as well as scientific knowledge. The junior high school certificate is necessary to enter this level.

Not only do they practice inside workshops and labs for the technical instruction, but they also practice outside in different types of manufacturing industries. Supplementary outside instructions are necessary to support it. The specialty of mechatronics has been teaching in our school since 2014, in fact, First-generation graduating students honored July 2017. We do not have enough experience in this field, but the students try to build some prototypes to improve their knowledge.

Also, in collaboration with the United Nations Development Programme, our school has developed the “Construye T” program, a space where the students do a lot of activities to reinforce and develop their social-emotional skills to ensure they get this technical degree. The importance of understanding the interrelationships between environmental and individual factors.

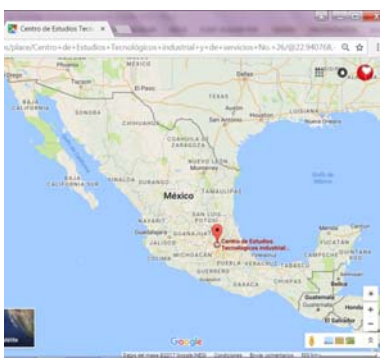

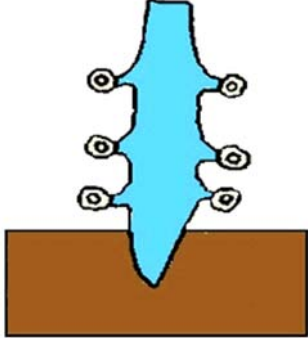

This program helps them to take care by themselves, to identify risk factors that affect adolescents like as youth violence, teens pregnancy, drugs consumption, etc.

School name: CETIS 26 Technical High School

The Centre for Industrial and Services Technological Studies (CETIS 26 by its Spanish acronym) is a public school, it was established in 1978 in the municipality of Atitalaquia in the Mexican State of Hidalgo. CETIS 26 is one among 14 Hidalgo State's technical schools.
