---

PR message: “The formation of world-class 18-year-olds”  
世界に通用する 18 歳

---

Our school, Ritsumeikan Keisho is a superior school attached to Ritsumeikan University in the field of global activity and science projects. For example, the Ministry of Education, Culture, Sports, Science and Technology (MEXT) selected Keisho as a Super Science High school (SSH) and Super Global High school (SGH).

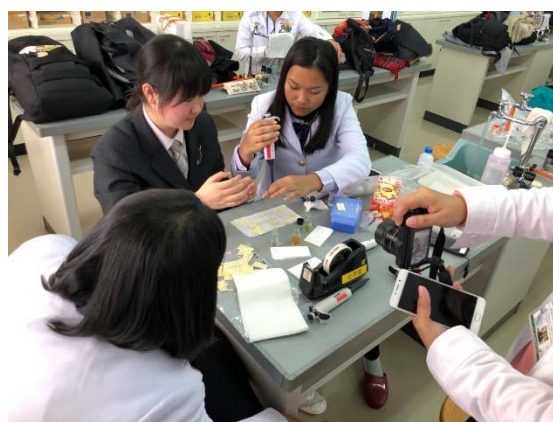

Our school has a lot of foreign students. They are from countries such as the U.S.A., Germany, China, and Egypt. For Japanese students, it is fantastic to interact with foreign students.

Also, our school has a lot of international exchange programs such as the SSH Overseas Program, SGH Overseas Program and JENESYS. Not only becoming good friends, but also doing co-research, presentations, and cultural exchange. We can get valuable experiences.

## School name: Ritsumeikan Keisho Senior High School

When students are in second grade, they go abroad (such as the U.S.A., Thailand, Galapagos, Poland and so on) for about one week to learn about the world. Through this program, they recognize differences between Japan and other countries, and experience attractions throughout the world.

Malaysia

Botswana

Our club, the Nature Science Club has two groups. These are the Physics and Biology Group. Some of our research includes the cause of the “Blue Pond” in Biei, an identification method of ammonites, and parthenogenesis of cockroaches. We received gold prizes at the science competition held in October.
