

Introduction of Our School

School name: Caritas Don Bosco School
(カリタス ドン・ボスコ スクール)

School address: Laguna Blvd., Laguna Technopark, Binan City, Laguna, Philippines
(フィリッピン国ラグーナ州ビーニャン市ラグーナテクノパーク、ラグーナ大通り)

School URL: <http://caritasdonbosco.weebly.com/>

PR message: Love for Technology used for Our Service to All.

CARITAS DON BOSCO SCHOOL (CDBS)

Caritas Don Bosco School was founded in 1994 by the Caritas Sisters of Jesus from Japan. From a small number of students, the population has grown to cater about a thousand students from Kindergarten to Grade 12. Apart from the regular curriculum, the school also offers elective subjects namely: Japanese Language, Drafting, Electronics and Robotics. The school also believes in the principle, "Education is a matter of the heart." which is made evident in how the school forms not only academically competent learners, but also learners with good values and character.

CDBS ROBOTICS

In June 2015, the long-awaited dream of including Robotics as a subject in the school curriculum was fulfilled. In its first few years of being included in the school curriculum, robotics was only taught to Junior High School students. Now, robotics is taught to students from Elementary to Senior High School.

The Robotics Club was created to further address the students' growing interest in robotics. The club started with only a few dedicated students and has now grown to over fifty students who continuously involve and improve themselves in the field of robotics. Over the years, the team has participated and represented both school and country in numerous local and international events where they won recognitions for their work. Currently, the team is focusing on formulating possible solutions to reoccurring problems while integrating robotics for the betterment of society.
