Hand shape classification in various pronation angles using a wearable wrist contour sensor
Rui Fukui, Masahiko Watanabe, Masamichi Shimosaka & Tomomasa Sato
pages 3-11
Keywords: wearable sensor; user interface; hand shape recognition; wrist contour; unobtrusive device

A method of grasp point selection from an item of clothing using hem element relations
Kimitoshi Yamazaki
pages 13-24
Keywords: clothing; grasp point selection; hem element

Tojisha-Kenkyu of autism spectrum disorders
Shinichiro Kumagaya
pages 25-34
Keywords: autism spectrum disorders, Tojisha-Kenkyu, autistic sociality, prediction error, peer support

Posture estimation of hose-shaped robot by using active microphone array
Yoshiaki Bando, Takuma Otsuba, Takeshi Mizumoto, Katsutoshi Itoyama, Masashi Konyo, Satoshi Tadokoro, Kazuhiro Nakadai & Hiroshi G. Okuno
pages 35-49
Keywords: rescue robotics; hose-shaped robot; localization; active microphone array; robot audition

Non-member of RSJ:

Hand shape classification in various pronation angles using a wearable wrist contour sensor
Rui Fukui, Masahiko Watanabe, Masamichi Shimosaka & Tomomasa Sato
pages 3-11
Keywords: wearable sensor; user interface; hand shape recognition; wrist contour; unobtrusive device

Graphical Abstract

A method of grasp point selection from an item of clothing using hem element relations
Kimitoshi Yamazaki
pages 13-24
Keywords: clothing; grasp point selection; hem element

Graphical Abstract

Tojisha-Kenkyu of autism spectrum disorders
Shinichiro Kumagaya
pages 25-34
Keywords: autism spectrum disorders, Tojisha-Kenkyu, autistic sociality, prediction error, peer support

Graphical Abstract

Posture estimation of hose-shaped robot by using active microphone array
Yoshiaki Bando, Takuma Otsuba, Takeshi Mizumoto, Katsutoshi Itoyama, Masashi Konyo, Satoshi Tadokoro, Kazuhiro Nakadai & Hiroshi G. Okuno
pages 35-49
Keywords: rescue robotics; hose-shaped robot; localization; active microphone array; robot audition

Graphical Abstract
Realizing whole-body tactile interactions with a self-organizing, multi-modal artificial skin on a humanoid robot
P. Mittendorfer, E. Yoshida & G. Cheng
pages 51-67
Keywords: artificial skin; self-organization; whole-body tactile interaction; humanoid robots

Graphical Abstract

All-round two-wheeled quadrotor helicopters with protect-frames for air–land–sea vehicle (controller design and automatic charging equipment)
Nana Takahashi, Shuhei Yamashita, Yurina Sato, Yuta Kutsuna & Manabu Yamada
pages 69-87
Keywords: quadrotor helicopter; all-round UAV; automatic charging device; nonlinear control; control system design

Graphical Abstract

Design and development of an autonomous wave-powered boat with a wave devouring propulsion system
Y. Terao & N. Sakagami
pages 89-102
Keywords: wave-powered boat; wave devouring propulsion system; wave energy; hull design; autonomous surface vehicle

Graphical Abstract

Fabrication of a fish-like underwater robot with flexible plastic film body
Mizuho Shibata & Norimitsu Sakagami
pages 103-113
Keywords: mobile manipulators; optimal payload; dynamic environments; optimal path

Graphical Abstract
