(スーパーカミオカンデがある町の高校です)

Super-kamiokande

Hida-Kamioka High School is the smallest full-time high school with 172 students located in Hida-Kamioka, which is known as the home of “Super-Kamiokande”, the world’s largest underground Neutrino detector attracting attention with Nobel Prize in Physics of Dr. Kajita.

School name: Hida-Kamioka High school

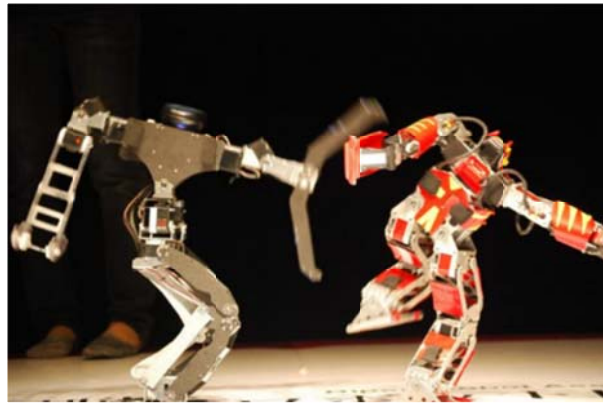

Neutrino-Series

These robots were named Neutrino after the great discovery of neutrino, and are famous among the robot builders all over Japan.

ROBO-ONE

We are one of the leading teams in ROBO-ONE tournament, a martial art meet of the bipedal robots to select a top of the bipedal robots all over Japan.

I n t e r n a t i o n a l R o b

We participated in an international robot contest held in Korea as a member of the Japanese team for 2 years in successions.

We won the championship at a boxing competition in 2014 and won the championship at a hurdle relay this year.
